BUT THERE IS POTENTIAL FOR MANY MORE OLDER PEOPLE TO CYCLE

60-69 YRS

27% of 60-69 year olds own a bicycle but only 1 in 9 regularly use their bike

CYCLE PATHS

42% would cycle (more) if more dedicated cycle paths

E-BIKES

e-bikes support older people’s cycling. In the Netherlands one third of all distance cycled is by e-bike!

MORE CYCLING WILL BENEFIT HEALTH IN LATER LIFE

Cycling could make a valuable contribution in promoting active ageing and prolonged independence and good health.

Physical activity declines with age to the extent that by 75 years only 1 in 10 men and 1 in 20 women are sufficiently active for good health.

ABSENCE OF OLDER PEOPLE CYCLING IS GETTING NOTICED

Public figures are starting to draw attention to the unequal distribution of cycling amongst the population.

“At the moment cycling is disproportionately young and male and that’s because of the conditions. I suppose those are the people who feel able to cycle...What I want to see from these changes, and I think we will see, is far more women doing it, far more older people doing it”.

London’s Former Cycling Commissioner Andrew Gilligan discussing the Mayor of London’s plans for cycling in the capital.

Cycling in Later Life in the UK

LOW LEVEL OF CYCLING AMONG OLDER PEOPLE IN THE UK

The share of journeys made by bicycle is low for all age groups, but particularly low in older age.

DIFFERENT STORY ELSEWHERE

Cycling is an important method of transport in older age in other parts of Northern Europe.

Share of journeys by people aged 65+

- UK 1%
- Denmark 15%
- Netherlands 23%
- Germany 9%

LACK OF CONFIDENCE OR CAPABILITY TO CYCLE ON UK ROADS

Nearly half of older people feel it is physically difficult for them to cycle and only one in five are confident cycling on roads.

- Poor health or disability: 43% of 60+ yrs vs 6% of 16-59 yrs
- Confidence on roads: 22% of 60+ yrs vs 41% of 16-59 yrs
